

5th International Conference on Surgery & Anesthesia 2020 Conference Announcement, March 09-10, 2020 | Rome, Italy

Vakhtang Shoshiashvili

Associate Professor, Department of Interclinical Relations, European University, Tbilisi, Georgia, E-mail: vshoshia@yahoo.com

Surgery is actually a surgical specialty performed by **General Surgeons** for a wide range of common disorders. Every individual practicing surgery has to begin with General procedure of performing surgeries. Many of them then move on with practicing in various fields of surgery depending on their choice of stream and area of interest to perform surgery on different parts of the Human body. **Anesthesia** is a medical procedure followed to induce immobility in human body or retract from any involuntary and voluntary actions produced, during a **surgical procedure** which can be painful to an extent that cannot be tolerated by human body. Various medications are delivered to a patient in order to retain his state of **paralysis** with lowered pain and no reflexes of the Autonomic Nervous system. The best grouping of drugs for any given patient and procedure is typically selected by an **anesthetist**, or another source such as an operating division practitioner, anesthetist practitioner, **physician assistant** or nurse anesthetist (depending on local practice), in consultation with the patient and the **surgeon**, **dentist**, or other practitioner executing the operative procedure.

The Surgery & Anesthesia 2020 is an event that aims to explore the Latest innovations and researches in the field of Surgery & Anesthesia, scheduled to be held on March 09 and 10, 2020 at Rome, Italy. The conference will serve as a platform to bring together leading clinicians with different specialties such R&D Companies, Healthcare companies, Entrepreneurs, General Surgeons, Anesthesia Technicians, Research Scholars, Scientists, Healthcare Innovators, Physicians, Clinical Researchers, Life Science Investors, Policymakers and Regulators, Professional Service Professionals, Academic Researchers with a wide range of selected topics for the participants to choose from, to deliver a talk with their most recent researched works in their particular areas of interests like **General Surgery**, Cardiac Surgery, Neurosurgery, Orthopedics, ENT Surgery, Microsurgery, Colorectal, Vein Surgery, Bariatric, Urology Surgery, Obstetrics, Gynecologic, Laser Surgery, Hand Surgery, Robotics, Head Neck Surgery, Vascular Surgery, Laparoscopic, Paediatrics, **Oral & Maxillofacial**, Plastic Surgery, Transplantation, Anesthetics, Sedation, Ambulatory Anesthesia, Pediatric Anesthesia, Spinal Anesthesia, Epidural Anesthesia, **Anesthetic Adjunct**,

Steroid Anesthetics, Propofol, Benefits of Anesthesia, Anesthesia Equipment, Anxiolytics, **Narcotics**, Paralytics, Pain, **Analgesia**, NSAID's, Amnesia, Postoperative Nausea and Vomiting, Mortality, Emergence, Coma.

Keynote talks have been confirmed by our OCM's

Dr. Ernesto Miguel Delgado Cidranes is delivering a Keynote talk on "**Chronic Neuropathic Pain: From Neural Stimulation to Tissue Regeneration**". Fundamental information about the Surgery & Anesthesia is going to be discussed in 5th International Conference on Surgery & Anesthesia (ICSA 2020) which is going to be held during March 9-10, 2020, Rome, Italy with the theme "**Latest innovations and researches in the field of Surgery & Anesthesia**" under the Organizing Committee Members. We are very delightful in hosting the next upcoming series with the healthy coordination of our Organizing Committee Members in different parts of the world.

Organizing Committee Members:

- Dr. Ernesto Miguel Delgado Cidranes: Professor of Anesthesiology, Complutense University, Madrid, Spain.
- Dr. Vakhtang Shoshiashvili: Associate Professor, Department of Interclinical Relations, European University, Tbilisi, Georgia.

Regards

Anne George
